ALACRETE Geopolymer Concrete

'ALACRETE' Geopolymer Concrete

Application Areas

1. Construction and repair of highways, roads, and airport runways.
2. Tiles & high resistance to corrosion.
3. Best surface floor drainage in the water flow roads and highways with low maintenance.
4. Best surface floor drainage concrete to be used in cold climates.
5. Applied in order to prevent landslides from reaching the road.
6. May be used for concrete structures that will be under constant stress (road, wall, etc.). Pipes, concrete bridges, and other water concrete structures.

'ALACRETE' Geopolymer Concrete

Application Areas

1. Because of its high resistance to acid and toxic waste, geopolymer concrete is
2. Can be applied in manufacture of sewer pipes
3. Sustainable areas coast sectors
4. Landfills.
5. Because of its high resistance to temperature
6. Can be used in the manufacture of industrial chimneys
7. Manufacture
8. Water-based drainage in city
9. Pipelines for sulphur, acid, vapours
