

# Hydrostatic Equilibrium Moulding for the production of a concrete shell structure

Frank OMLOO

CATENA BETON

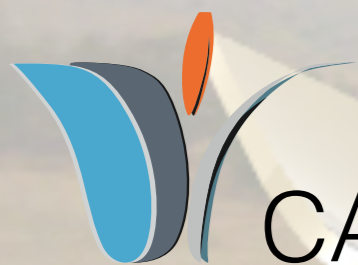

picture courtesy of Stahlform Engineering

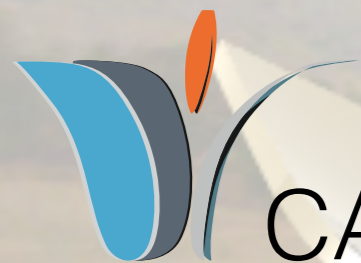

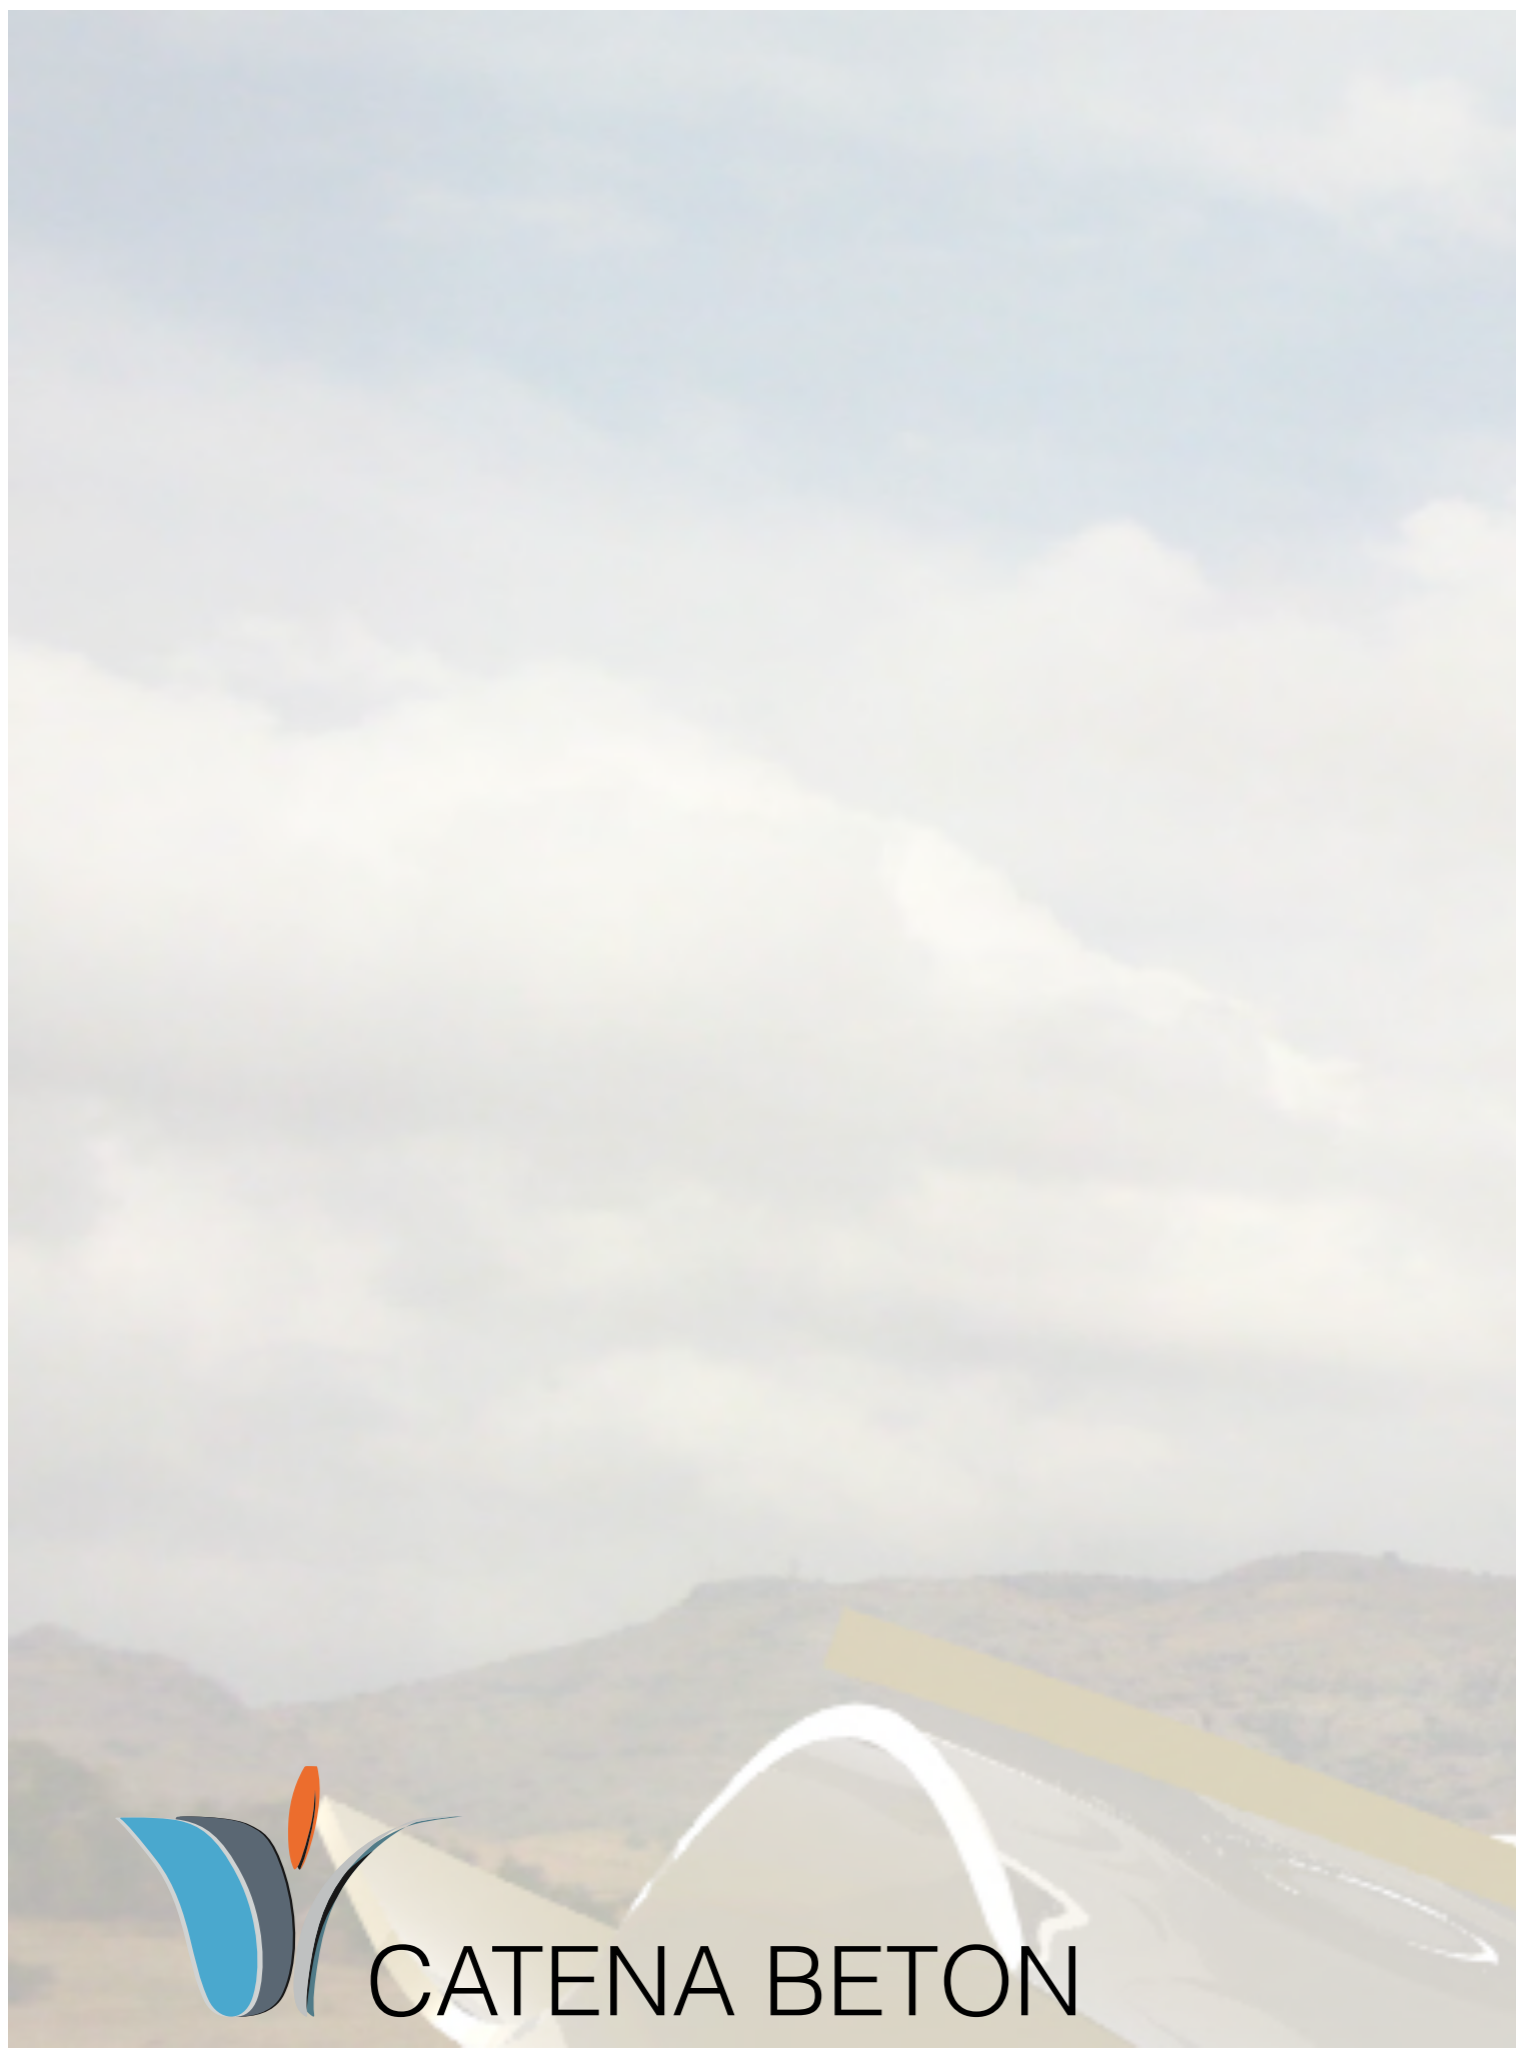

what, if we just had to worry about form, and forget about hydrostatic pressure?

hydrostatic equilibrium mould

CATENA BETON

we will be able to use thinner, more flexible and more mouldable materials for making moulds and this will, as well, unveil different methods of fabrication for these moulds.

Inspired by Justo Garcia Rubio (design for el Colegio en Monesterio)
